

## MAXHUB XBar V70 & W70 Kits: Videobars for Medium to Large Microsoft Teams Rooms

Though the videobars share the same design and identical performance, the **V70 runs on Android** and the **W70 runs on Windows IoT**. Organisations can choose the platform that best fits their environment.

- **Quad 50MP Cameras:** Ultra-wide 125° field of view with dual telephoto lenses for close-up tracking
- **Smart AI Video:** Auto Framing, Speaker Tracking, Intelligent Focus, and Smart Gathering
- **16-Microphone Array:** Covers up to 10 m with AI noise reduction, echo cancellation, and anti-reverb
- **Stereo Speakers:** Dual 20W full-frequency output with quad-bass/passive units for immersive sound
- **BYOD Mode:** Connect to your PC with a single USB cable for flexible laptop-based meetings
- **Cloud Device Management:** Remote monitoring and configuration with MAXHUB Pivot
- **Microsoft Teams Rooms Certified:**
  - V70 Kit: Built on MDEP and certified for MTR on Android (MTRoA)
  - W70 Kit: Certified for MTR on Windows (MTRoW)

### XBar V70 Kit's Console

AP30 touch console
